FitRank - Recruiter-Trustable AI Ranking

FitRank Approach Deck (markdown source)

1. FitRank Recruiter-Trustable AI Ranking
2. Problem keyword filters fail on adversarial profiles
3. Data Insights traps, templates, ~900 real ML profiles
4. Core Idea profile coherence over keyword matching
5. Architecture 10-phase pipeline
6. Differentiators coherence, template awareness, skill trust, Redrob signals
7. Scoring Model weighted components and penalties
8. Examples genuine ML engineer vs honeypot profile
9. Results valid

Slide 2

Problem: keyword filters fail on adversarial candidate profiles

Slide 3

Data Insights: traps, templates, ~900 genuine ML practitioners

Slide 4

Core Idea: profile coherence beats keyword stuffing

Slide 5

Architecture: 10-phase offline scoring pipeline

Slide 6

Differentiators: coherence, templates, skill trust, Redrob signals

Slide 7

Scoring Model: JD fit, career evidence, coherence, trust, availability

Slide 8

Examples: Senior NLP Engineer ranks above HR Manager honeypot

Slide 9

Results: validator pass, <5 min runtime, audit report

Slide 10

Redrob Vision: intelligent discovery product feature
